OnTheHub.com is a good option for renting this software at a reasonable price. If you think you'll be doing a quantitative dissertation, I recommend working with SPSS now to get more comfortable with it. • Excel can do most statistical analyses, including regression analysis. To perform regression, you need to activate data analysis in your program. This video (at the 1:30 mark) explains how to do that. If you think you will be doing a qualitative dissertation and don't want to invest in SPSS, you should be able to perform most of the statistics we'll be covering in Excel.
